

# PRAB MAGNETIC BAG FILTER

## COST EFFECTIVE, REUSABLE MAGNETS

### Retain 198% Greater Containment Levels than Conventional Filter Bags

The Mag Bag has a multi-polarity design to attract microscopic ferrous impurities along the entire length of the 12" or 24" magnetic bars. A multiple-magnet configuration provides a powerful sphere of influence while still maintaining high production flow rates. According to independent field studies, ferrous containment levels retained using the Mag Bag are 198% greater than conventional filter bags.

The Mag Bag comes in a range of sizes and materials for virtually any liquid-based application. It features coated magnets that are rated and finished for your specific application.

### Applications:

- Parts Washers
- Plating
- Grinding
- Cutting
- Painting
- Boring
- Food Processors
- Pre-cleaning Process Water

A true performance guarantee ensuring your PRAB equipment achieves the specific results it was designed and manufactured to deliver. And if you need technical support, call us. We are available 24/7.
