

PRAB FURNACE FEEDER

CONVEYORS STILL OPERATING IN THE FIELD AFTER 57 YEARS

Keeps Operators Away from Melting Furnace

The PRAB Furnace Feeder allows for meter feeding of abrasive die scrap, casting metal, and other materials directly into the furnace- keeping operators from harms way at a distance from the melting area.

"Our process of disposing metal scrap has become more ergonomic and safer."

—Jack Rovin, Martin-Baker

PRAB Furnace Feeder

System Features and Benefits:

- Feeds both reverbs and "through-the-wall" designs
- Standard design incorporates oscillating steel trough plus heat shields and stainless-steel discharge chutes that extend into melt area
- May be batch loaded or used as final component of a complete scrap-to-remelt system for scrap metal recycling
- Easily replaceable stainless-steel trough extension and heat shield
- Optional mobile/traversing systems and sound-proofing are available

A true performance guarantee ensuring your PRAB equipment achieves the specific results it was designed and manufactured to deliver. And if you need technical support, call us. We are available 24/7.
